

POSITION: Analyst

LOCATION: Boulder, CO

JOB DESCRIPTION: This position will be responsible for the analysis and assessment of solar, storage and LED opportunities within our client building portfolios. The position will also drive the quantitative and qualitative assessment of solar, storage and LED project proposals on behalf of Black Bear Clients.

The Project Analyst will work closely with multiple Energy Project Teams to ensure successful project development and execution. Key Responsibilities:

1. Solar production modeling
2. Manage property database
3. Work with executive leadership team to identify renewable energy opportunities based on client portfolios.
4. Analyze key project details such as utility data, facility load profiles, and system operating data using software platform.
5. Lead due diligence of projects, as appropriate.
6. Assemble utility data
7. Acquire and manage data required for RFP process
8. Participates in the bid review process and financial analysis to ensure that the deal structure, economic and tax assumptions are properly analyzed.
9. Prepare customer cost savings analyses, comparing utility rates to PPA, lease or ownership prices. Prepare presentations to internal and external executives.
10. Foster effective and positive business relationships with all parties throughout all project phases, and develops and maintain relationships with U.S and/ or international industry contacts.
11. Closely follows industry trends and competitor activities, including regulatory/ financial incentives, power pricing and structured financing transactions.
12. Financial Modeling
13. Perform other duties as required

REQUIREMENTS: Bachelor's in Engineering or in a business-related degree preferred and one or more years of work experience in project management, analysis, or renewable energy. The ability to stay current with changing technologies, regulations, and trends, including building and maintaining strong relationships with clients, partners and industry leaders. Proven ability to gather, validate, and analyze quantitative information with accuracy and reliability. Demonstrated ability to effectively manage multiple priorities and projects. Strong prioritization, communication and organizational skills; and the ability to quickly work into new tasks and accommodate with new circumstances. Must have an entrepreneurial attitude and a diplomatic approach. Ability to travel 7-10 days a month, as required. Ability to perform duties in a collaborative, fast paced working environment. Strong verbal and written communication and presentation skills. Strong analytical, quantitative and problem-solving skills. Self-starter with strong organizational skills, extreme attention to detail and commitment to producing high quality work product, and ability to multi-task under tight time pressures.
