

POSITION: Channel Partner Data Intern

LOCATION: Remote/Boulder, CO

JOB DESCRIPTION: Channel Partner Data Intern will assist in the updates of the Channel Partner and Active Solar Market databases. The Channel Partner database houses a list of the solar developers we currently invite to bid on our projects along with the markets they work in. The desired outcome of this project is to make this list more robust and gain insight into the diversity and inclusion practices of current channel partners. The ideal candidate is a creative thinker who is comfortable working both individually and in a group setting. Daily responsibilities will include market research, Channel Partner outreach content development, and data organization. The Channel Partner Data Intern will work closely with the analysis team to ensure the generation of a more robust Channel Partner database.

Intern will be compensated \$15/hour and work 10-15 hours/ week

KEY RESPONSIBILITIES:

1. Conduct market and Channel Partner research
2. New/existing Channel Partner research
3. Channel Partner Qualification Form data backfill
4. Create final presentation of findings
5. Additional tasks as needed

DESIRED EDUCATION AND SKILLS:

- Bachelor's degree in progress
- Proven interest in cleantech
- High level of verbal and written communication skills
- Team Player with an eagerness to learn
- Entrepreneurial attitude and a diplomatic approach
- Attention to detail
- Proficiency with Excel, Word, PowerPoint
